

MAAX Saunas PRO 5

Premium Wellness Features

- **5 Chromolight Stations**
 The 5 overhead chromolight modules feature relaxing red lights for beautiful illumination and serene ambience.
- **Jade Gemstones**
 Jade is a semi-precious gemstone and natural conductor of far infrared heat. The jade stones are placed on the floor and seat to emit mid and far infrared energy.
- **6 Carbon Fiber Far Infrared Heaters (FIR)**
 Carbon infrared heaters with low EMF emissions (i.e. near zero) surround the body with soothing far infrared heat
- **Digital LED Control Panel with Speakers**
 FM Radio, Bluetooth, MP3/USB Port, Speakers & Sauna Function Controls for added luxury and precise temperature settings.
- **Pian and Pink Ferric Oxide**
 Semi-precious Gemstones are incorporated into our wellness saunas. When heated, these gemstones are known as one of the few precious stones to conduct Infrared heat.

The patented Photonic Sauna technology is the first to combine traditional sauna elements with infrared technology and red light therapy. In the patented photonic sauna, users can experience the relaxation and detoxification effects of a traditional sauna, the deep heat penetration of infrared technology, and the rejuvenating properties of red light therapy. The combination of these elements offers the most comprehensive wellness experience of any sauna, promoting relaxation, detoxification, pain relief, and skin rejuvenation among a host of other benefits.

MAAX Saunas PRO 5

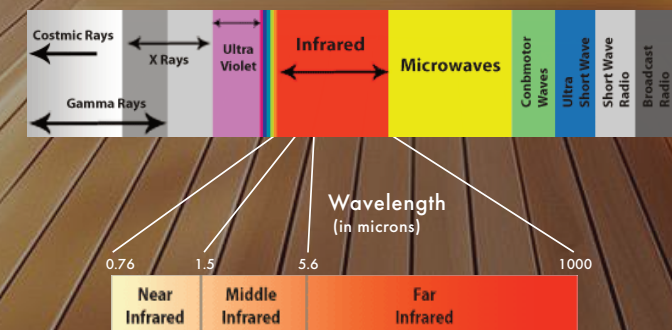

Multi-Energy Infrared System

MAAX Saunas PRO 5 utilizes Far and Mid-range Infrared Heat to warm the body from the inside out. Because infrared heat is so unique, it is comfortable & effective at lower temperatures (100°-150°) and differs from a traditional dry heat sauna system, which requires temperatures up to 180°-200°.

The **MAAX Saunas PRO 5's** radiant infrared heat system has premium features which are unique and superior amongst all commercial infrared saunas. It's a holistic multi-energy infrared sauna with 6 IR heaters and Jade & Tourmaline gemstone natural energy IR emitters. This advanced infrared system generates more far infrared for faster heating and premium wellness.

Mid (MIR) Infrared Heater System
 MIR heat is great for total body heating.

Carbon-Far (FIR) Infrared Heater System
 FIR transfers energy effectively warms the body with radiant heating. Its properties help to promote a healthy natural perspiration and holistic sweat, similar to exercise. Radiant heat waves indirectly heat your body and are similar to the warm rays you feel from the sun.

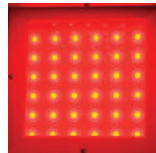

Note: MAAX Saunas PRO is not a medical device, it makes no medical claims, and is not for any medical purpose. MAAX Saunas PRO is a general wellness product for a healthy activity and healthy lifestyle.

Why Choose MAAX Saunas PRO 5 Sauna?

Dual Spectrum Infrared (IR) Wavelengths Using 6 Separate Heaters
Our exclusive **Dual Spectrum IR** system allows the user to experience the benefits of 6 IR heaters with 2 distinct wavelengths for Far & Mid infrared heat. The **Far IR Carbon Heaters** are placed near the back, sides, & floor of the sauna to provide full-surround whole body even heating and warmth. **Mid IR Heaters** are placed in the front of the sauna to eliminate cold spots & accelerate heating.

Chromolights

SaunaWellness™ PRO 5 has five (5) Chromolight stations. The light module stations beautifully enhance the sauna ambience for a greater relaxation wellness experience. Eight Beautiful color selections.

BIAN Gemstones

Three (3) Beautifully designed, diamond-shaped wall panels with large Bian semi-precious gemstones have been added into the sauna. When heated, Bian gemstones emit negative ions which contribute to purifying the air in the sauna chamber. Additionally, tourmaline is a natural emitter of far infrared energy as an added infrared boost.

Jade Gemstones

Jade is one of the most sought after semi-precious gemstones worldwide and is included in our saunas for premium luxury. The Jade stones have been strategically placed on the floor and seat of the sauna cabin. When heated, Jade absorbs the far infrared heat to gently emit its own natural IR photons throughout the sauna chamber.
